Interests

Software & Web Development, Mobile Apps (Flutter/Dart), Embedded Systems & Arduino Automation, Data

Languages

Turkish	Native
English	B2
German	A2

Yahya Berke ÖZÇUBUKCU

Dynamic 4th-year Computer Engineering student skilled in software development, **Arduino hardware automation**, and embedded systems. Possesses a unique combination of technical expertise—proven during **UEFA's ICT event operations**—and exceptional stress tolerance developed as a **licensed TFF referee**. A methodical and disciplined technical thinker ready to deliver clean code and innovative engineering solutions

Education and Qualifications

Undergraduate computer engineer Oct 2023 - Jun 2027
University of Nişantaşı, İstanbul

Work experience

Freelance Software Developer Jun 2025 - Aug 2025
Self-Employed, Istanbul

Developed responsive web applications using HTML, CSS, and JavaScript
Built interactive user interfaces and small-scale projects
Improved problem-solving and debugging skills

ICT Staff Volunteer May 2026 - May 2026
UEFA (Union of European Football Associations), İstanbul, Türkiye

* Part of the official ICT infrastructure and support team for the UEFA Europa League Final 2026.
* Assisted in the deployment, monitoring, and troubleshooting of critical network systems, communication devices, and tech equipment at the venue.
* Provided rapid-response technical assistance to international media, UEFA officials, and stadium staff in a high-pressure, live event environment.
* Collaborated closely with multi-national technical teams to ensure seamless connectivity and operational continuity throughout the tournament.

Football Referee Dec 2023 - Present
Turkish Football Federation (TFF), İstanbul, Türkiye

* Actively officiating official and competitive football matches under the Turkish Football Federation, ensuring full compliance with the Laws of the Game.
* Managing on-field player conflicts, high-stakes communication, and tactical discipline under intense match and crowd pressure.
* Demonstrating exceptional split-second decision-making, sports leadership, emotional intelligence, and continuous risk management.

Courses

Web Development (HTML, CSS, JavaScript) Oct 2025 - May 2026
Udemy

Learned fundamentals of web development
Built responsive web interfaces
Practiced real-world projects

Python Programming Jan 2026 - Apr 2026
Turkcell Geleceği Yazanlar

Learned core programming concepts
Worked on problem solving and basic projects
Gained understanding of programming logic
Improved algorithmic thinking

Flutter Development (Ongoing) 2026 - Present
Self-Learning

Currently learning mobile app development
Building cross-platform applications

Next Generation Technologies Summit Mar 2026 - Apr 2026
Istanbul Nişantaşı University
Attended a summit focused on emerging technologies, digital transformation, and current industry trends. Gained insights from industry professionals.

Disaster Awareness Training Program May 2024 - Jun 2024
Istanbul Nişantaşı University Continuing Education Center
Received training on disaster awareness, emergency response, and risk management.

Blockchain Technologies Training Mar 2026 - Apr 2026
Turkcell Geleceği Yazanlar
Gained foundational knowledge of blockchain, Web3, smart contracts, and decentralized systems.

Projects

- **Arcade Hubs – Mobile Game Collection (Google Play Console)**
- Designed and developed a comprehensive mobile arcade platform featuring a collection of **20 classic games**, built with a focus on seamless performance. Managed the entire deployment pipeline on the **Google Play Console**, including asset optimization, versioning, and leading the **14-day closed testing phase with 20 testers**
-
- **Hand Recognition System (Computer Vision)**
- Developed a real-time hand recognition and tracking system utilizing **Python, OpenCV, and Mediapipe**. Focused on high-accuracy gesture detection, real-time tracking, and frame-rate optimization.
-
- **Operating Systems Simulation (CPU Scheduling)**
- Implemented core CPU scheduling algorithms including **FCFS, SJF (Preemptive & Non-Preemptive), Round Robin, and Priority Scheduling** using **Python** as part of academic coursework to simulate process management.
-
- **ATM Simulation System**
- Created a robust terminal-based ATM simulation in **Python** featuring secure user **authentication, deposit, withdrawal**, and real-time transaction history management.
-
- **Spotify Data Analysis & Visualization**
- Conducted comprehensive data analysis on extensive Spotify datasets using **Python (Pandas, Matplotlib, Seaborn)**, extracting meaningful streaming insights and trends through custom charts and statistics.
-
- **Interactive Web Applications Portfolio**
- Built a personal responsive **Portfolio Website** and multiple web applications utilizing **pure HTML5, CSS3, and JavaScript**. Focused heavily on **dynamic DOM manipulation, modern Glassmorphic UI/UX aesthetics**, and cross-browser responsiveness.
-
- **Secure Password Generator Tools**
- Designed and implemented customizable password generation tools in both **CLI (Command Line Interface)** and algorithmic formats to output high-entropy, secure variations based on user-defined constraints.

Certification

Turkcell Academy – Python Certification Series (101–401) 2026
Successfully completed a comprehensive Python training program covering beginner to advanced levels. Key topics: Python fundamentals, OOP, data structures, problem-solving, file handling, and clean code practices.

Turkcell Geleceği Yazanlar – Blockchain Technologies Training 2026
Gained foundational knowledge in blockchain, Web3, smart contracts, and decentralized systems.

Istanbul Nişantaşı University – Next Generation Technologies Summit March 2026
Attended a technology summit focused on emerging technologies, digital transformation, and current industry trends.

Istanbul Nişantaşı University – Disaster Awareness Training Program May 2024 – June 2024
Received training on disaster awareness, emergency response, and risk management.

Web Development (HTML, CSS, JavaScript) Oct 2025 – May 2026
Learned core web development concepts including responsive design, DOM manipulation, and interactive UI development.

Flutter Development (Ongoing) 2026 – Present
Learning mobile app development using Flutter, focusing on UI/UX and application architecture.

UEFA Europa League Final 2026 – Official Volunteer Diploma May 2026
Served as an official ICT staff volunteer for UEFA and the Turkish Football Federation (TFF) during the UEFA Europa League Final 2026 in Istanbul. Contributed to the successful delivery of a major international sporting event by supporting IT operations, infrastructure deployment, and collaborating within a high-pressure, dynamic team environment.
